Profile Summary

Computer Science student at BINUS University with a strong foundation in software engineering, algorithm design, and backend system architecture. Experienced in developing custom management software, automating business workflows, and managing database systems to optimize real-world operational efficiency. Skilled at turning complex practical problems into reliable, user-friendly, and production-ready applications.

Education

Binus University (3.71 / 4.00 GPA) <i>Bachelor of Computer Science (B28)</i> • Coursework: Data Structures, Algorithm Design & Analysis, Object-Oriented Programming, Database Systems, Artificial Intelligence, Web Programming, Software Engineering, Computer Networks, Operating Systems, Human-Computer Interaction.	Expected Graduate 2028 <i>Jakarta, Indonesia</i>
Tarsisius 1 High School <i>Science & Mathematics High School Diploma</i> • Coursework: Mathematics, Physics, Chemistry, Computer Studies.	2021 – 2024 <i>Jakarta, Indonesia</i>

Work Experience

Operations & Logistics Application Developer · <i>Contract</i> <i>Kopi Tubruk Gajah Project (Pekan Raya Jakarta / PRJ)</i> • Designed and deployed a mobile-friendly logistics and fleet management application for cart dispatchers and SPG sales teams during the PRJ event. • Automated daily sales reconciliation, stock tracking, and cart movement logs, significantly reducing night-closing duration and eliminating manual calculation errors. • Optimized end-of-day reporting workflows, enabling field staff to complete daily audit procedures faster and more accurately.	Jun 2026 – Jul 2026 <i>Jakarta, Indonesia</i>
Software Developer (Laundry Management System) · <i>Freelance</i> <i>Independent Project</i> • Developed an end-to-end digital laundry management and point-of-sale (POS) application to replace manual paper receipts with a paperless digital workflow. • Integrated automated revenue calculations, customer order tracking, and financial summary reports , eliminating accounting discrepancies and streamlining daily business operations. • Built a user-friendly interface tailored for quick order entry, receipt generation, and real-time status monitoring.	Jan 2025 – Now <i>Jakarta, Indonesia</i>

Technical Skills

Programming & Tools Python, C/C++, Java, SQL, HTML/CSS, Git/GitHub	Frameworks & Cloud Vercel, Railway, Next.js/React, REST APIs	Databases & Backend Supabase, PostgreSQL, MySQL, Database Management	Core Competencies Workflow Automation, POS Systems, System Testing, Data Structures
